December 14, 1982

Dear Harold,

Here's a little Christmas rememberance from Reader's Digest. It is sent with our grateful appreciation for your patience in sharing with us your knowledge and expertise.

You once mentioned the Walkman Sony you saw somewhere, and I also discussed it with Jim. This is not the one that you particularly liked, but I was not able to find that model, which Jim said was a Walkman II-F. But the Sony people tell me that this model is as good as any they make, so I thought that if it isn't what you can best use, you can probably work out a swap with a Sony dealer. Everything is just as it came, except for the fact I slipped the batteries into it to see if it worked. To my ears, the sound is so magnificent that I nearly kept it!

Again, thank you for everything.

Sincerely,

Hen.
